SUMMARY

I'm Pyae Phyo Aung (Austin), iOS Developer specializing in SwiftUI and MVVM architecture, building scalable and production-ready mobile applications. **WWDC 2024 Winner** with experience in multi-role service platforms and real-world app deployment.

WORK EXPERIENCE

MCG Care (Smart Aircon Management System) June 2025 - Present

- Built a multi-role SwiftUI application (Customer, Technician, Admin) with MVVM architecture.
- Implemented automated technician assignment and dynamic time-slot validation logic.
- Integrated Laravel REST APIs with server-side pagination and role-based access control.
- Designed complete booking lifecycle including feedback and status tracking.

Laravel/PHP Developer – Mercury Consulting (MCR) June 2025 - Present

- Developed and maintained ERP modules using Laravel and Oracle Database.
- Designed RESTful APIs and optimized database queries for performance.
- Collaborated with cross-functional teams to deliver scalable backend services.

Coach at VMS Hackathon at True Lab Assumption University September 2023

- Led and empower students to kickstart ios development.
- Coached participants and help them solving the problems and bugs.
- Permanently recognized and featured as a coach on VMS official website.

iOS Developer of Avents App by D*Code July 2023 - Present

- Event planning and registering app for faculties.
- Implemented a dynamic and responsive UI using SwiftUI, ensuring compatibility across all iOS devices.
- Designed and developed custom SwiftUI components, custom navigation routes, enhancing the user experience.
- Collaborated with a team to integrate backend services and ensure seamless data synchronization.

EDUCATION

Bachelor of Computer Science November 2022 - Present

Assumption University of Thailand

- Major in Software Engineering.
